**Injuries/Surgeries:**

(Date & Description)

Auto Accidents: N/A / \_\_\_\_\_

Recreational Accidents: N/A / \_\_\_\_\_

Fractures / Dislocations: N/A / \_\_\_\_\_

Surgeries: N/A / \_\_\_\_\_

**Family History:**

Does anyone in your family suffer with any of the following conditions? (Please circle or highlight Father &/or Mother)

F M Heart Disease      F M Stroke      F M Cancer (types): \_\_\_\_\_

F M High BP      F M Thyroid      F M Neurological (Parkinson's, ALS, MS) other \_\_\_\_\_

F M Diabetes      F M Asthma      F M Other \_\_\_\_\_

**Fees & Care Plans:**

Initial Exam	\$95 - \$125
X-rays	\$75/set (typically 2 sets with initial start up)
Adjustments	\$45 - \$60
Re-Exam	\$60

On your second visit, Dr. Sullivan will review the results of your exam and go over your care plan. We will also review your financial responsibilities regarding your care. If you have insurance, please read the section below.

**Insurance:** We used to be 'in network' with many insurance companies however we found being 'out of network' offered most of our patients' *better* coverage and *fewer* restrictions. We can work with most insurance companies to submit claims electronically on your behalf. Currently we are '*in network*' with **Medicare** and are considered '*out of network*' for **all others**. You may call the (800) number on the back of your card to check your coverage; however, we will call to verify your chiropractic benefits and discuss them with you on your second visit when the doctor reviews your care plan.

**MEDICARE** – Medicare has limited chiropractic coverage; however, they **DO NOT** contribute towards the **initial exam or x-rays** in a chiropractic office. Your initial visit will most likely include the initial exam (\$95) and both sets of x-rays (\$150), for a total cost of \$245.

**MEDICAID** – Currently Medicaid DOES NOT offer ANY chiropractic benefits. The fees listed above will be your full financial responsibility if you have Medicaid or any Medicaid type policy.

I understand that I am directly and fully responsible to BC Family Chiropractic for all fees associated with chiropractic care whether or not paid by insurance. If I have insurance, I authorize and assign all insurance benefits payable to me for services rendered if BC Family Chiropractic accepts assignment on my behalf. I authorize use of my signature below on all insurance submissions. Copies of any x-ray reports will be released upon written request, however the original films are the sole legal property of this practice and that by law the doctor must retain these films for a period of no less than 7 years.

The above information is true and accurate to the best of my knowledge.

_____	_____	_____	_____
Patient Name	Patient Signature	Date	Dr. Initials

**Informed Consent for Female Patients:** By signing below I acknowledge that I understand the hazardous effects of x-rays to an unborn child and that I am not pregnant to the best of my knowledge. The first day of my last menstrual cycle was on \_\_\_\_\_. I hereby consent to have any diagnostic x-ray exam the doctor deems necessary.

# ACTIVITIES OF DAILY LIVING

In order to properly assess your condition, we must understand how much your health problems have affected your ability to manage everyday activities. For each item below, **please circle the number which most closely describes your condition currently.**

- 1) **Pain Intensity:**    0-----1-----2-----3-----4  
                                  None                                    Mild                                    Moderate                                    Severe                                    Unbearable
  
- 2) **Frequency of Pain:**    0-----1-----2-----3-----4  
                                  None                                    25% of the day                                    50% of the day                                    75% of the day                                    Constant
  
- 3) **Lifting:**    0-----1-----2-----3-----4  
                                  No Pain w/  
                                 Heavy Weight                                    Increased Pain  
                                 w/ Heavy Wt.                                    Increased Pain  
                                 w/ Moderate Wt.                                    Increased Pain  
                                 w/ Light Wt.                                    Increased Pain  
                                 w/ Any Wt.
  
- 4) **Walking:**    0-----1-----2-----3-----4  
                                  No Pain w/  
                                 Any Distance                                    Increased Pain  
                                 After 1 Mile                                    Increased Pain  
                                 After ½ Mile                                    Increased Pain  
                                 After ¼ Mile                                    Increased Pain  
                                 w/ Any Distance
  
- 5) **Standing:**    0-----1-----2-----3-----4  
                                  No Pain After  
                                 Several Hours                                    Increased Pain  
                                 After Several Hours                                    Increased Pain  
                                 After 1 Hour                                    Increased Pain  
                                 After ½ Hour                                    Increased Pain  
                                 w/ Any Standing
  
- 6) **Travel:**    0-----1-----2-----3-----4  
     (Driving)                                    No Pain on  
                                 Long Trips                                    Mild Pain on  
                                 Long Trips                                    Moderate Pain  
                                 on Long Trips                                    Moderate Pain  
                                 on Short Trips                                    Severe Pain on  
                                 Short Trips
  
- 7) **Work:**    0-----1-----2-----3-----4  
                                  Do Usual Work  
                                 + Unlimited Extra                                    Do Usual Work  
                                 But No Extra                                    Can do 50%  
                                 of Usual Work                                    Can do 25%  
                                 of Usual Work                                    Cannot  
                                 Work
  
- 8) **Sleeping:**    0-----1-----2-----3-----4  
                                  Perfect Sleep                                    Mildly Disturbed                                    Moderately Disturbed                                    Severely Disturbed                                    Totally Disturbed
  
- 9) **Personal Care:**    0-----1-----2-----3-----4  
     (Washing,  
                                 Dressing, etc.)                                    No Pain                                    Mild Pain                                    Moderate Pain                                    Severe Pain                                    Unbearable Pain
  
- 10) **Recreation:**    0-----1-----2-----3-----4  
                                  Can do All  
                                 Activities                                    Can do Most  
                                 Activities                                    Can do Some  
                                 Activities                                    Can do Few  
                                 Activities                                    Cannot do Any  
                                 Activities

**BC FAMILY CHIROPRACTIC, PC**  
**365 HARRY L. DRIVE**  
**JOHNSON CITY, NY 13790**  
**(607) 754-5900 / (607) 217-5257 (fax)**

**Informed Consent**

We encourage and support a **shared decision making process** regarding your health needs. As a part of that process you have a right to be informed about the condition of your health and the recommended care and treatment to be provided to you so that you can make the decision whether or not to undergo such care with full.

**Chiropractic** is based on the science which concerns itself with the relationship between structures (primarily the spine) and function (primarily of the nervous system) and how this relationship can affect the restoration and preservation of health.

**Adjustments** are made by chiropractors in order to correct or reduce spinal and extremity joint subluxations. **Vertebral subluxation** is a condition where one or more vertebra in the spine is misaligned and/or does not move properly causing interference and/or irritation to the nervous system. The primary goal in chiropractic care is the removal and/or reduction of nerve interference caused by vertebral subluxation. A chiropractic examination will be performed which may include spinal and physical examination, orthopedic and neurological testing, palpation, specialized instrumentation and/or radiological examination (x-rays).

The **chiropractic adjustment** is the application of a precise movement and/or force into the spine in order to reduce or correct vertebral subluxation(s). There are a number of different methods or techniques by which the chiropractic adjustment is delivered but are typically delivered by hand. Some may require the use of an instrument or other specialized equipment. Among other things, chiropractic care may reduce pain, increase mobility and improve quality of life.

In addition to the benefits of chiropractic care and treatment, one should also be aware of the existence of some **risks and limitations** of this care. The risks are seldom high enough to contraindicate care and all health care procedures have some risk associated with them. Risks associated with some chiropractic treatment may include soreness, musculoskeletal sprain/strain, and fracture. In addition there are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke; rather, recent studies indicate that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in process. However, you are being informed of this reported association because a stroke may cause serious neurological impairment.

**I have been informed of the nature and purpose of chiropractic care, the possible consequences of care, and the risks of care, including the risk that the care may not accomplish the desired objective. Reasonable alternative treatments have been explained, including the risks, consequences and probable effectiveness of each. I have been advised of the possible consequences if no care is received. I acknowledge that no guarantees have been made to me concerning the results of the care.**

**I HAVE READ THE ABOVE PARAGRAPH. I UNDERSTAND THE INFORMATION PROVIDED. ALL QUESTIONS ABOUT THIS INFORMATION HAVE BEEN ANSWERED TO MY SATISFACTION. HAVING THIS KNOWLEDGE, I KNOWINGLY AUTHORIZE BC FAMILY CHIROPRACTIC TO PROCEED WITH CHIROPRACTIC.**
